P&N Tech Achieves Advanced Wireless LAN Specialization from Cisco

P&N Tech (www.pntech.net), a division of Postlethwaite & Netterville, Louisiana's leading accounting and business advisory firm, is proud to announce that it has achieved the Advanced Wireless LAN (Local Area Network) Specialization from Cisco Systems.

As a value-added provider, P&N Tech is proud to maintain partner status with Cisco Systems, in addition to several other industry leaders. Cisco's Advanced Wireless LAN Specialization recognizes its partners for their knowledge in building and maintaining unified wireless LAN solutions.

To achieve this specialization, service providers must demonstrate that they are qualified to support customers with Advanced Wireless LAN in the USA. This specialization indicates significant knowledge in designing, deploying and maintaining end-to-end Cisco LAN solutions.

P&N Tech is a resource for businesses and governmental agencies seeking implementation and consulting regarding their IT systems. By combining extensive technology and business process knowledge, we can provide a truly innovative approach to your information technology needs. Today, PNT enjoys a track record of more than 20 years of network integration sales and service in the areas of unified communications, server virtualization and storage and advance network design and installation.
